

Blockcerts is a new initiative by the Ministry for Education and Employment (MEDE) to give all Maltese students lifelong ownership of their credentials. Developed by MIT, Blockcerts is a way to verify official records using a blockchain. Once you receive your Blockcert, you own it for life. You can share it with anyone you choose, like an employer when you're applying for a job. No matter where in the world you go, sharing and verifying your credential is instant and free.

To receive your Blockcert from Ministry for Education and Employment (MEDE):

1

Download the free Blockcerts Wallet app on your phone.

Your Wallet is private and no one has access to it but you. Remember to back up your secret passphrase!

2

Look for an invitation email from MEDE saying they want to issue your digital credential.

If you don't receive an email by your graduation date, contact the MEDE Registrar at certificates.mede@ilearn.edu.mt

3

Click the green "Add Issuer" button in the email to accept.

You must accept the invitation to receive a digital credential.
Your consent is important to us!

4

Look for a second email indicating your digital credential is ready.

Download your credential and store it in a safe place.
If you don't receive an email by your graduation date, contact the MEDE Registrar at certificates.mede@ilearn.edu.mt

5

Click the green "Import" button in the email to import your credential into your Blockcerts Wallet for easy sharing and verification!
